

## **Success Story: Global Legal Service Provider ISMS Implementation – ISO 27001 Certification**

### **The Client**

The Client is an organization with global reach and diversified lines of business, emphasizing the delivery of technology solutions for business needs. Such solutions include legal support functions, marketing and communications, healthcare information management and document aggregation.

### **Business Motivators**

The client, given the large scale and complexity of its operations, sought a means to achieve better management insight into its business processes and to identify steps toward improvements in both process and results. They turned to Orange Parachute to establish an improved Information Security Management System (ISMS) as a key step toward their goal.

### **The Challenge**

The Client didn't have much time to focus on implementing an ISMS and didn't have the right staff available to implement on their own. They were losing business because they had a competitor that was ISO 27001 certified.

### **The Solution**

Leveraging our consulting Subject Matter Expertise, the client was able to:

- Clearly determine the Scope of their ISMS
- Conduct a seamless Risk Assessment
- Implement and Operationalize their ISMS
- Achieve ISO 27001 certification

### **The Result**

As a result of our services, the client achieve ISO 27001 certification and immediately began to win more business and their resultant ISMS has provided them clear ROI for information security and compliance program efforts.
