

Success Story: Global Manufacturing Solutions Provider Global ISO 27001 Gap Assessment

The Client

Our client ('Client') is a leading global manufacturing solutions provider.

Business Motivators

Client wanted to more efficiently and effectively manage security operations around the globe. They've decided that an ISMS is a natural solution to move them from "practicing" security to "managing" security for their global operation.

The Challenge

Client was unclear about their current security posture on a global scale, and not certain where to begin with ISMS and ISO 27001.

The Solution

Leveraging our Subject Matter Expertise, the client was able to:

- Clearly determine the "low hanging fruit" so they can prioritize their efforts
- Gain a snap shot of current state as to how they currently measure up to ISO 27001
- Clearly plan for their ISMS Scope and next steps

The Result

As a result of our services, the client now knows where they stand against ISO 27001 and how best to approach a global Information Security Management System (ISMS).
