

Success Story: Cloud Service Provider Compliance Management – HIPAA/HITECH

Situation

The Client provides Software as a Service to customers in a variety of verticals, including Retail, Healthcare, Financial Services, Logistics and many others.

The Engagement

Orange Parachute consultants worked closely with Client staff to develop and implement a Compliance Management System to address HIPAA/HITECH requirements.

The Approach

Orange Parachute consultants met with Client's security management staff to determine the scope of the work that would be most effective. This resulted in multiple short-term engagements that provided them with an accurate and achievable Compliance Management System to address HIPAA/HITECH and position them to quickly and easily address any other security and compliance requirement.

The Result

The risk assessment project resulted in HIPAA/HITECH compliance for their business. We are currently working with them to expand the scope of their Compliance Management System.
