

Success Story: Legal Services Provider Security Program Vision, Orange Parachute Proven Process Package and ISO 27001 Gap Assessment

The Client

Our client ('Client') is a leading provider of legal services with a global footprint and clients in numerous countries.

Business Motivators

Clients wanted to clearly define their Security Program Vision and gain Traction for their Vision, leveraging an Information Security Management System to help create more efficiency, effectiveness and usability for their new risk-based Program.

The Challenge

The entire Security Program is run by one individual who was mostly technical, so they didn't have internal strategic expertise to help them clearly identify their Vision and gain Traction for that Vision.

The Solution

Leveraging the Proven Process Package our Subject Matter Expertise, the client was able to:

- Clearly determine the Scope of their ISMS
- Identify existing gaps against ISO 27001
- Set clear targets for ISO 27001 certification
- Clearly determine their Security Program Vision and put in the necessary structure to achieve Traction for that Vision.

The Result

As a result of our products and services, the client now has a clear plan of attack for moving their ISMS effort forward, targeting ISO 27001 certification in late 2013.
