

Success Story: Cloud Service Provider (SaaS) Orange Parachute Proven Process Package featuring RM Studio

The Client

Our client ('Client') is a leading Cloud Service Provider (SaaS) to the Financial Services industry.

Business Motivators

Client wanted to prove security internally and externally and speed to compliance, but they didn't have much in their budget to get the process of ISMS and ISO 27001 started, so they purchased the Orange Parachute Proven Process Package featuring RM Studio.

The Challenge

The client did not have a formal security program in place and only had one person that could dedicate time toward their ISMS/ISO 27001 project, so they wanted to automate the process as much as possible and work within the constraints of a limited budget.

The Solution

Leveraging the Proven Process Package and RM Studio, the client was able to:

- Clearly determine the Scope of their ISMS
- Leverage the mature documentation from the Proven Process Package to plug and play as it pertains to the documentation requirements for ISO 27001
- RM Studio software allows them to automate the Risk Management process, saving an extensive amount of time and money and providing clear and achievable goals for control implementation
- Execute the project leveraging one person in the functional role of the ISMS Manager
- Achieve ISO 27001 Conformance, with the goal of certification in 2013

The Result

As a result, we were able to successfully deliver through our products and services and the client is now ISO 27001 conformant, with a plan of achieving ISO 27001 certification in 2013.
